

Miracle Choice Vegetal Silica:

DESCRIPTION

Silica has been shown to be essential for proper storage of calcium and for maintaining healthy connective tissue – a key component of cardiovascular, gastrointestinal, joint and bone tissues. Our vegetal silica is prepared in a liquid organic mineral base of fulvic-humic complex to ensure the vegetal silica is bonded. This process allows transporting of the essential ingredients to the cells for maximum absorption.

Miracle Choice Vegetal Silica rejuvenates cells to their fullest potential. White Willow, Red Clover, Scullcap, Yucca and Hawthorne Berry have been added to enhance the product and provide additional support for inflammation and circulation.

Miracles Choice Vegetal Silica is harvested from organic plants. The plants are grown in soil naturally rich in fulvic acid, making Nature's Miracle Vegetal Silica the highest quality and most usable source of Vegetal Silica available. The natural chelated fulvic acid transports the essential active ingredients to the cells to restore proper healing in the entire body.

POTENTIAL BENEFITS

- Supports healthy hair, skin, nails, and teeth
- Necessary for proper and speedy healing of bone fractures, torn and damaged tendons and ligaments
- Maintain normal bone structure in the elderly.
- Maintains the integrity, elasticity, and stability of arterial walls and thus helps prevent atherosclerosis.
- Preserve strong, flexible nails.
- Ensure the integrity of tooth enamel and thus help prevent decay.
- Maintain the elasticity and suppleness of the skin.
- Retain the natural shine, elasticity, and strength of hair.
